

Undergraduate Research Assistant for NSF-funded Project

The Clean Energy Materials Modeling Lab (CEM²Lab), Department of Chemistry and Physics, seeks applicants to conduct computational research under the supervision of Dr. Juganta Roy on an NSF-funded project. Selected applicants are expected to work a sufficient amount of time necessary to complete their project. ***The time commitment per week (18 hours) will be distributed across research, academic course work, bi-weekly meetings, once-a-month high school visits, mentoring, and grad school preparation.*** Selected candidates will have opportunities to mentor high school students participating in the Computational Summer Camp.

What we Study?

- ✓ Renewable energy (solar cells)
- ✓ Computational materials discovery
- ✓ Machine learning/Artificial intelligence
- ✓ Modeling of renewable energy materials

Benefits:

- ✓ Gain research experience in **computational chemistry/AI**
- ✓ Build a foundation in **data science research**
- ✓ Receive a stipend **\$12,000 per year (Fall, Spring and Summer)** in exchange for 18 hours per week
- ✓ *A few hours will be dedicated to your academic course & grad school preparation*
- ✓ Establish scientific communication and leadership skills.

Who can join?

- ✓ Undergraduate (Sophomore/Junior) students majoring in any of the following fields: **Chemistry/Biochemistry/Physics/Engineering.**
- ✓ Those students interested in being part of an interdisciplinary team.

Required materials for application

- ✓ Copies of College Transcripts (Unofficial)
- ✓ One recommendation letter from any faculty member from your department (directly sent to Dr. Roy, email: jroy@wtamu.edu)
- ✓ Completed application form which is available in the Chemistry and Physics departmental office and on the Bulletin Boards on the 1st floor of the Natural Sciences Building
- ✓ **Deadline: August 29th, Noon**
- ✓ Applications must be sent **electronically** to Dr. Juganta Roy, jroy@wtamu.edu, by the **August 29th deadline.**
- ✓ Awardees will be notified shortly after this deadline and must sign a letter of acceptance and data collection waiver prior to being granted the award

Undergraduate Research Assistant Application Form

Name _____

Buff ID _____

Phone _____

Email _____

Major _____

1). List or describe your intended professional goals following graduation.

2). Indicate how this research will help you reach the goals indicated above.

Required Documents:

1. Completed application form
2. Unofficial College transcripts
3. Recommendation letter from a faculty member from your department to jroy@wtamu.edu
